

## **What is the included roll of tape for?**

Despite being a mass-produced vehicle, no two van floor layouts are ever exactly the same. As such, we template several of the same vans to determine a pattern that works for all of them. Depending on how your van compares to our average van layout, you may have a few gaps along the perimeter of your mats. In addition, if your factory flooring is lighter in color, these gaps will appear more pronounced. We have found that by adding black gaffer's tape directly to the floor where the gaps appear, you can effectively make the gaps a lot less noticeable. Gaffer's tape holds firm (if applied to a clean surface) and will not leave a sticky residue in the event that you need to remove it someday.

For more information or help with applying the tape correctly, please contact us at [info@inhabitdesignworks.com](mailto:info@inhabitdesignworks.com) or 503-329-2141
